Since Dolly the sheep was born, controversy has swirled around the technology of cloning. We recoil at the prospect of human copies, manufactured men and women, nefarious impersonators and resurrections of the dead. Such reactions have serious legal consequences: lawmakers have banned stem cell research along with the cloning of babies. But what if our minds have been playing tricks on us? What if everything we thought we knew about human cloning is rooted in intuition rather than fact? Human Cloning: Four Fallacies and Their Legal Consequences is a rollicking ride through science, psychology, and the law. Drawing on sources ranging from science fiction films to the Congressional Record, this book unmasks the role that psychological essentialism has played in bringing about cloning bans. It explains how hidden intuitions have caused conservatives and liberals to act contrary to their own most cherished ideals and values.

Neural Networks provides a gentle introduction to the subject, for undergraduates from Computer Science and Electrical Engineering degrees. This updated and revised second edition assumes no prior knowledge and sets out to describe what neural nets are, what they do, and how they do it. The main networks covered include ADALINE, WISARD, the Hopfield Network, Bidirectional Associative Memory, the Boltzmann machine, counter-propogation and ART networks, and Kohonen's self-organizing maps. These networks are discussed by means of examples, giving the reader a good overall knowledge of current developments in the field.

HealthTracks ... My Health Journal at 50 Plus provides students with a comprehensive and thorough resource on all aspects
of caring for young children with special needs. It also includes advice and guidance on new legislation, particularly the new Code of Practice for Special Educational Needs and crucially the implications this has for all Early Years settings. The book is divided into two parts. Part one addresses the background to disability, the complexity of the legislation and other related issues. Part two gives factual information and practical care advice on some of the more common conditions of young children.

Anaesthetic and Extracorporeal Gas Transfer, Keith L. Dorrington, 1989, 0198576323, 9780198576327. This book presents a rigorous analysis of a wide range of gas transfer problems of common interest in anesthesia and intensive care. Oxygen uptake and carbon dioxide elimination are prerequisites of the maintenance of human life, and the judicious administration of anesthetic agents remains the primary means of achieving unconsciousness during surgical operations. The book discusses a wide range of equipment used in modern hospital practice to control these aspects of a patient's therapy. Many of the solutions are presented for the first time. This is the first text to cover the whole spectrum of gas transfer from single oxygen masks to artificial lungs in a form which is accessible to both clinicians and biomedical engineering students.

Bobby Dog And The Flying Frog, Rebecca Pepin, 2004, 0976068400, 9780976068402. Children will not be able to put down this beautifully illustrated book full of bright colors and eye-popping animated characters. In a unique approach to
storytelling, photographs of a spunky Jack Russell Terrier named Bobby Dog are incorporated into the brilliant scenery alongside cartoon creatures and people. The tale of Bobby Dog and the Flying Frog is packed with rhyme and rhythm as it describes the adventures of the lovable pooch on board a miniature helicopter. Unfortunately Bobby Dog is forced to leave behind his friend Lollygog. She is a slippery little tadpole and Bobby Dog knows his pollywog pal would not be able to remain buckled up. During his travels Bobby Dog encounters characters like Patti Polar Bear who fishes on a mountain top. He's also got a bird's eye view of a hullabaloo at the old saloon. But when Bobby Dog returns from his fascinating journey he is unable to find Lollygog to share his stories. What has happened to his young playmate? It seems Lollygog is no longer a tadpole. So what has become of her? Read Bobby Dog and the Flying Frog to find out.

Exploring Green Lanes and the Stories They Tell - South and South-East Devon, Valerie R. Belsey , 2008, 1900322293, 9781900322294. Here is a chance to leave the car behind and penetrate deep into the South Devon countryside with only the birds for company. Valerie Belsey has gathered together 50 walks which take you through wooded slopes, high heathland, river valleys, sheltered coves, exposed headlands and rolling grassland. She looks at the history of these routes, and the stories that surround them; the smugglers ways in from the coast, the mine workers who had to walk a long way to their quarries, the lace makers who trudged through the lanes bringing lace to Honiton and the drovers moving their animals from one farm to the next. Featured on the walks are castles and ancient monuments, and lively historical heroes such as Thomas Wakley, founder of The Lancet, Cavaliers fleeing from Roundheads, a poet seeking an Ancient Mariner and some tanners still working in a small town based industry. These 50 lanes readily complement those already explored in Exploring Green Lanes in the South Hams and lead the walker forth once again into the labyrinth of brambly burrow lanes (with only a bus ticket to protect you!)

Cyprus: A Modern History, Bill Mallinson , 2005, 1850435804, 9781850435808. This narrative history of Cyprus—the most thorough and up-to-date account currently available—examines the modern history of the island during a period of enormous change. Topics covered range from the British acquisition of Cyprus in 1878, when its strategic importance was cemented, to the more recent American and Soviet involvement during the Cold War. It focuses particularly on the period leading up to and following the Turkish invasion of 1974, the apparent moves towards reunification, and the growing
importance of the EU both for Cyprus and for Turkey. The book will be an essential reference tool for all those interested in Cyprus and the emerging politics of the Eastern Mediterranean.

My Toys, Gran's Toys, Nicola Tuxworth, 1999, 0199155771, 9780199155774. The Oxford Literacy Web is an exciting new literacy programme designed to guide schools successfully through the primary years. Fitting the requirements of the National Literacy Strategy, National Curriculum in England and Wales, English Language 5-14 in Scotland, and Common Curriculum in Northern Ireland, the Oxford Literacy Web guides pupils through the core skills associated with learning to read and write with a diverse range of literary styles within the genres of fiction, non-fiction, rhymes, language, and poetry. The "Non-Fiction" strand is a series of colourful, lively information books. They can be used to teach valuable information retrieval and research skills, and they enable children to learn to read and write a range of different text types. The books can be used with children at different levels of reading ability for shared reading with the teacher, guided reading, or independent reading. The First Non-Fiction books are designed to be used with children at Reception or Year 1. They present a range of text types on a variety of infant topics at a very low reading level (there is normally no more than one or two lines of text per page). The books are available in both standard and 'big book' format. Make a Milk-shake contains instructions to a child for making a simple chocolate milk-shake.

The Knucklebook: Everything You Need to Know about Baseball's Strangest Pitch--The Knuckleball, Dave Clark, 2012, 1566639697, 9781566639699. This little book will teach you all you need to know about the most frustrating yet entertaining pitch in baseball: the knuckleball. It makes batters look foolish when it works; it embarrasses pitchers when it doesn't...or if it works too well. It humiliates catchers and umpires. It confounds spectators. Dave Clark has spent most of a lifetime studying the knuckleball, talking to the major league pitchers who have thrown it, and throwing a few of his own. His book explains the strange workings of the pitch and how it's used, no matter what your interest whether you're a pitcher, batter, catcher, umpire, coach, spectator, or parent of any of the above. Everything Mr. Clark demonstrates in The Knucklebook is carefully illustrated with line drawings, so if you're an average high school pitcher who can throw strikes, you'll be able to throw a knuckleball exactly like a legendary Hall of Famer. You'll find appropriate and hilarious comments from those who have experienced the game of baseball as it's been affected by the wandering floater. Like those who throw the knuckler, all this information was scattered to far-flung corners of the baseball world until Mr. Clark gathered and compiled it. Reading his little book, you'll end up less mystified and more enlightened about this antic pitch. Or, like the pitch itself, you can just ride the breezes and enjoy the dancing flight from beginning to end. With 51 black-and-white line drawings.

Bad Henry, Stanley C. Baldwin, Jerry B. Jenkins, Hank Aaron, 1974, 0801959608, 9780801959608.
The Argument from Injustice: A Reply to Legal Positivism, Robert Alexy, 2009, 0199584214, 9780199584215. At the heart of this book is the age-old question of how law and morality are related. The legal positivist, insisting on the separation of the two, explicates the concept of law independently of morality. The author challenges this view, arguing that there are, first, conceptually necessary connections between law and morality and, second, normative reasons for including moral elements in the concept of law. While the conceptual argument alone is too limited to establish a sufficiently strong connection between law and morality, and the normative argument alone fails to address the nature of law, the two arguments together support a nonpositivistic concept of law, toppling legal positivism qua comprehensive theory of law. The author makes his case within a conceptual framework of five distinctions that can be variously combined to represent a multiplicity of presuppositions or perspectives underlying the enquiry into the relationship of law and morality. In this context, it can indeed be shown that there are perspectives that bespeak solely a positivistic concept of law. The decisive point, however, is that there is a perspective, necessary to the law, that necessarily presupposes a nonpositivistic concept of law. This is the perspective of a participant in the legal system, asking for the correct answer to a legal question in this legal system. The participant-thesis is demonstrated by appeal to Gustav Radbruch’s formula (extreme injustice is not law) and to the judge’s balancing of principles in deciding a concrete case. The author arrives at a concept of law that systematically links classical elements of legal positivism - authoritative issuance and social efficacy - with the desideratum of nonpositivistic legal theory, correctness of content.

View From Rat Lake, John Gierach, 2013, 1476740178, 9781476740171. Brilliant, witty, perceptive essays about fly-fishing, the natural world, and life in general by the acknowledged master of fishing writers. In the world of fishing there are magic phrases that are guaranteed to summon the demon. Among them are: remote trout lake, fish up to 13 pounds, the place the guides fish on their days off, writes John Gierach in this wonderful collection of thirteen essays inspired by a fishing trip to Rat Lake, a remote body of water in Montana. Once again John Gierach does what he does best - explain the peculiarities of the fishing life in a way that will amuse novices and seasoned fly fishers alike. The View from Rat Lake deftly examines man in nature and nature in man, the pleasures of fishing the high country, and the high and low comedy that occasionally overcomes even the best-planned fishing trip. Some typically sage observations from The View from Rat Lake: One of the things we truly fish for [is] an occasion for self-congratulation. In every catch-and-release fisherman’s past there is an old black frying pan. We . . . believe that a 12-inch trout caught on a dry fly is four
inches longer than a 12-inch trout caught on a nymph or streamer. 

Counseling and Psychotherapy, Les Parrott, 2002, 0534593372, 9780534593377. This book will help students break the field of counseling into manageable pieces that can more easily be studied, critiqued, and eventually simulated into the student's understanding. The book provides a brief overview of the counseling profession and in-depth information on 10 major theoretical orientations. The author's writing style and presentation of the theories provide students with the foundations for understanding the field of counseling in an accessible manner.

The Discovery of Global Warming, Spencer R. Weart, 2004, 0674016378, 9780674016378. THIS EDITION HAS BEEN REPLACED BY A NEWER EDITION. In 2001 a panel representing virtually all the world's governments and climate scientists announced that they had reached a consensus: the world was warming at a rate without precedent during at least the last ten millennia, and that warming was caused by the buildup of greenhouse gases from human activity. The consensus itself was at least a century in the making. The story of how scientists reached their conclusion--by way of unexpected twists and turns and in the face of formidable intellectual, financial, and political obstacles--is told for the first time in The Discovery of Global Warming. Spencer R. Weart lucidly explains the emerging science, introduces us to the major players, and shows us how the Earth's irreducibly complicated climate system was mirrored by the global scientific community that studied it. Unlike familiar tales of Science Triumphant, this book portrays scientists working on bits and pieces of a topic so complex that they could never achieve full certainty--yet so important to human survival that provisional answers were essential. Weart unsparingly depicts the conflicts and mistakes, and how they sometimes led to fruitful results. His book reminds us that scientists do not work in isolation, but interact in crucial ways with the political system and with the general public. The book not only reveals the history of global warming, but also analyzes the nature of modern scientific work as it confronts the most difficult questions about the Earth's future.

Agile Java Development with Spring, Hibernate and Eclipse, Anil Hemrajani, 2006, 0132714906, 9780132714907. Agile Java Development With Spring, Hibernate and Eclipse is a book about robust technologies and effective methods which help bring simplicity back into the world of enterprise Java development. The three key technologies covered in this book, the Spring Framework, Hibernate and Eclipse, help reduce the complexity of enterprise Java development significantly. Furthermore, these technologies enable plain old Java objects (POJOs) to be deployed in light-weight containers versus heavy-handed remote objects that require heavy EJB containers. This book also extensively covers technologies such as Ant, JUnit, JSP tag libraries and touches upon other areas such as such logging, GUI based debugging, monitoring using JMX, job scheduling, emailing, and more. Also, Extreme Programming (XP), Agile Model Driven Development (AMDD) and refactoring are methods that can expedite the software development projects by reducing the amount of up front requirements and design; hence these methods are embedded throughout the book but with just enough details and examples to not sidetrack the focus of this book. In addition, this book contains well separated, subjective material (opinion sidebars), comic illustrations, tips and tricks, all of which provide real-world and practical perspectives on relevant topics. Last but not least, this book demonstrates the complete lifecycle by building and following a sample application, chapter-by-chapter, starting from conceptualization to production using the technology and processes covered in this book. In summary, by using the technologies and methods covered in this book, the reader will be able to effectively develop enterprise-class Java applications, in an agile manner!

A Spot of Bother, Mark Haddon, 2007, 0099506920, 9780099506928. George Hall doesn't understand the modern obsession with talking about everything. 'The secret of contentment, George felt, lay in ignoring many things completely.' Some things in life, however, cannot be ignored. At 57, George is settling down to a comfortable retirement, building a shed in his garden, reading historical novels, listening to a bit of light jazz. Then Katie, his tempestuous daughter, announces that she is getting remarried, to Ray. Her family is not pleased - as her brother Jamie observes, Ray has 'strangler's hands'. Katie can't decide if she loves Ray, or loves the wonderful way he has with her son Jacob, and her mother Jean is a bit put out by all the planning and arguing the wedding has occasioned, which get in the way of her quite fulfilling late-life affair with one of her husband's former colleagues. And the tidy and pleasant life Jamie has created crumbles when he fails to invite his lover, Tony, to the dreaded nuptials. Unnoticed in the uproar, George discovers a sinister lesion on his hip, and quietly begins to lose his mind. The way these damaged people fall apart - and come together - as a family is the true subject of Mark Haddon's disturbing yet very funny portrait of a dignified man.

The Friendship, Adam Sisman, 2007, 1101202017, 9781101202012. In Adam Sisman's previous book, the award-winning Boswell's Presumptuous Task, he inventively recounted the making of the most distinguished biography in the English language, James Boswell's Life of Johnson. Now, with The Friendship, Sisman details the relationship of two of the most important Romantic poets, William Wordsworth and Samuel Taylor Coleridge. The first modern biography to consider them together, The Friendship is a wonderfully readable account that evokes these two extraordinary personalities and situates them in their time, exploring the influence each writer had on the other, as well as providing glimpses of the creative process itself.

Mathematics in Action: Algebraic, Graphical, and Trigonometric Problem Solving, , 2010, 0321698614, 9780321698612. The third book of the Mathematics in Action series, Algebraic, Graphical, and Trigonometric Problem Solving, Fourth Edition, illustrates how mathematics arises naturally from everyday situations through updated and revised real-life activities and the accompanying practice exercises. Along with the activities and the exercises within the text, MathXL and MyMathLab have been enhanced to create a better overall learning experience for the reader. Technology integrated throughout the text helps readers interpret real-life data algebraically, numerically, symbolically, and graphically. The active style of this book develops readers mathematical literacy and builds a solid foundation for future study in mathematics and other disciplines.

*Just War Or Just Peace?: Humanitarian Intervention and International Law, Simon Chesterman*, 2001, 0199243379, 9780199243372. The question of the legality of humanitarian intervention is, at first blush, a simple one. The Charter of the United Nations clearly prohibits the use of force, with the only exceptions being self-defence and enforcement actions authorized by the Security Council. There are, however, long-standing arguments that a right of unilateral intervention pre-existed the Charter. This book, winner of an ASIL Certificate of Merit 2002, begins with an examination of the genealogy of that right, and argues that it might have survived the passage of the Charter, either through a loophole in Article 2(4) or as part of customary international law. It has also been argued that certain `illegitimate' regimes lose the attributes of sovereignty and thereby the protection given by the prohibition of the use of force. None of these arguments is found to have merit, either in principle or in the practice of states. A common justification for a right of unilateral humanitarian interventionconcerns the failure of the collective security mechanism created after the Second World War. Chapters 4 and 5, therefore, examine Security Council activism in the 1990s, notable for the plasticity of the circumstances in which the Council was prepared to assert its primary responsibility for international peace and security, and the contingency of its actions on the willingness of states to carry them out. This reduction of the Council's role from a substantive one to a formal one partly explains the recourse to unilateralism in that decade, most spectacularly in relation to the situation in Kosovo. Crucially, the book argues that such unilateral enforcement is not a substitute for but the opposite of collective action. Though often presented as the only alternative to inaction, incorporating a `right' of intervention would lead to more such interventions being undertaken in bad faith, it would be incoherent as a principle, and it would be inimical to the emergence of an international rule of law.

*Governmental and nonprofit accounting: theory and practice, Robert J. Freeman, Craig D. Shoulders*, 2000, 0130264695, 9780130264695. through simple experiments that require very little preparation but have a high interest value for the class. It presents a fun, light-hearted look at science for the non-scientist teacher and the second language student. Students will learn some basic scientific vocabulary, while also discovering the scientific process through motivating hands-on experiments. Throughout the unit students are shown the scientific inquiry process of identifying a question, listing the materials required, conducting and describing the experiment, analyzing the result and coming up with a conclusion. Along the way, they also learn about Francophone cultural components that are linked to their science theme. Final Task: Students work in small groups to create a science show for a younger audience. The show features fun and motivating science experiments. Each member in a group is integrated in the final presentation as host, expert, or lab technician. Workbook Blackline Masters support the core activities, and provide opportunities for students to practise language. Also included are additional complementary activities and a comprehensive French-English Lexique for student reference. Also includes the Mini-guide section reproduced in the back of the workbook.

*7 Souls*, Barnabas Miller, Jordan Orlando, 2011, 0143206257, 9780143206255. Mary expected her seventeenth birthday to be a blow-out to remember. Instead, she wakes up naked and scratched, in a mortifyingly public place, with no memory of how she got there. As her life spins out of control, Mary begins to think that someone is out to get her. But isn't she the popular girl everyone loves?

*The Myth of the Mainstream: Politics and Performing Arts in Australia Today*, Robyn Archer, 2005, 097573010X, 9780975730102. In a passionate personal/political statement, Australia's most celebrated festival director and cabaret artist accuses Australia and its political leaders of selling out its arts to populism and 'the myth of the mainstream'. While at home Australians are tolerant, imaginative and flexible, the mainstream no longer allows for difference of opinion in public.

*God Matters: Readings in the Philosophy of Religion*, Raymond Martin, Christopher Bernard, 2003, 0321103653, 9780321103659. God Matters is a state-of-the-art, accessible anthology of the major issues in philosophy of religion. Its accessibility is due to its mix of classic readings and brand new readings about contemporary issues, commissioned specifically with an undergraduate student in mind. These commissioned readings make the difficult concepts of contemporary philosophy of religion easy to understand, and are complemented by key excerpts from more technical philosophers' writing on the same subjects. The result is an engaging, comprehensive reader that introduces students to the most important ideas in classical and contemporary philosophy of religion, to the most important thinkers, and even
to excerpts from the key texts in which these thinkers presented their groundbreaking theories.

**The Blackwell City Reader, Gary Bridge, Sophie Watson**, 2010, 1405189835, 9781405189835. Updated to reflect the most current thinking on urban studies, this new edition of The Blackwell City Reader brings together a wide range of essential readings relating to the analysis and experience of cities across the globe. Selections are carefully gathered from a variety of academic disciplines ranging from architecture, sociology, and literature to cultural studies, philosophy, and even psychoanalysis to provide the most diverse perspectives and in-depth coverage of the field. The new edition incorporates major developments in the study of materialities and mobilities, two areas at the heart of many contemporary debates; it also features enhanced coverage on non-Western cities that reflect recent growth trends, especially in Asia, China, and India, making it the most international reader of its kind. The Blackwell City Reader, Second Edition combines established and novel readings from a wide range of theoretical perspectives and geographical locales to provide an indispensable source for the most up-to-date thinking on cities of today and tomorrow.

**Modern Design, Jonathan M. Woodham**, 2006, 0192806394, 9780192806390. From Jacobsen to Tupperware, this
A fascinating new dictionary of Modern Design covers the period from the mid-nineteenth century to the end of the twentieth. Both wide-ranging and comprehensive, it covers commercial design mass manufacture, as well as high art terms and aesthetic movements. Over 2,000 entries on names and movements from the past 150 years of design include ceramics, furniture, graphics, industrial design, interiors, and fashion, major museums and heritage sites, as well as biographical entries on designers and manufacturers. The dictionary, international in focus, also covers key design concepts, design terminology, and important design institutions. Other features include timelines of key design events and movements, and an index of author names for easy reference. It also features funky illustrations at every letter’s opening page, with zeitgeist design concepts from Action Man and Barbie to Ferrari and Electrolux. Written in a clear, accessible style, and with more comprehensive coverage than any of the other design dictionaries available, the Dictionary of Modern Design is an essential reference tool for students, and a useful addition to every designer’s and artist’s studio shelf.

Raising Children One Day at a Time: A Daily Survival Guide for Committed Parents : 365 Meditations, Thomas Wright, 2001, 0970844417, 9780970844415. For every parent who has gone the extra mile and made every possible attempt at doing the best they can in the raising of their children -- there is a special book that can add a new flavor to their efforts. Here are 365 fantastic readings ("meditations") that can be reading in two or three minutes and put to work immediately. The readings cover topics and issues parents of children from elementary through high school face each and every day: fear, cheating, respect, jealousy, pride, faith, temptation, guilt, sex, sharing, self-confidence, embarrassment, crisis, and anger (to name only a few). The author, a respected expert on dysfunctional family relationships and the special needs of children, is packed with practical solutions to everyday problems every family faces. A basis theme appears throughout the book: committed parents putting the recommendations to work will help their children in handling future situations and grow as parents. There is also a respect for God found throughout the pages of the book -- a reference that the
author isn't shy about promoting. Committed parents don't need lecturing and this book will reveal its message through highly effective meditations that will stand the test of time.

Dust Bowl: The Southern Plains in the 1930s, Donald Worster, 1982, 0199758697, 9780199758692. In the mid 1930s, North America's Great Plains faced one of the worst man-made environmental disasters in world history. Donald Worster's classic chronicle of the devastating years between 1929 and 1939 tells the story of the Dust Bowl in ecological as well as human terms. Now, twenty-five years after his book helped to define the new field of environmental history, Worster shares his more recent thoughts on the subject of the land and how humans interact with it. In a new afterword, he links the Dust Bowl to current political, economic and ecological issues--including the American livestock industry's exploitation of the Great Plains, and the on-going problem of desertification, which has now become a global phenomenon. He reflects on the state of the plains today and the threat of a new dustbowl. He outlines some solutions that have been proposed, such as "the Buffalo Commons," where deer, antelope, bison and elk would once more roam freely, and suggests that we may yet witness a Great Plains where native flora and fauna flourish while applied ecologists show farmers how to raise food on land modeled after the natural prairies that once existed.

The Quest for a Fusion Energy Reactor: An Insider's Account of the INTOR Workshop, Weston Stacey, 2010, 0199750882, 9780199750887. At the Geneva Superpower Summit in November 1985, Secretary of the former Soviet Union Mikhail Gorbachev and US President Ronald Regan agreed to pursue an international effort to develop fusion energy for peaceful purposes. At a time when tension between these cold war nations was very high, how were these leaders able to come together to work towards making nuclear fusion a feasible energy source? The Quest for a Fusion Energy Reactor is the story of the INTOR Workshop (INternational TOKamak Reactor) which brought together scientists and engineers from Europe, Japan, the United States, and the (then) USSR from 1978 to 1988 to share their individual research and work cooperatively on the design and development possibilities for harnessing nuclear energy. Drawing on his insights while serving as Vice Chairman of the INTOR Workshop, Weston Stacey offers an insider's account of both the participants' technical work and their fascinating political interactions under the blanket of the cold war. An accessible
presentation of their research on the viability of designing, constructing, and operating a Tokamak experimental power reactor is combined with personal anecdotes of the obstacles Workshop leaders and participants faced as they strove to make progress on the global future of nuclear fusion technology while balancing their own countries' priorities. The Workshop led to the International Thermonuclear Experimental Reactor (ITER), construction of which began in 2009 with the goal of demonstrating the scientific and technical feasibility of fusion power.

Paul Kirk's Championship Barbecue Sauces: 175 Make-Your-Own Sauces, Marinades, Dry Rubs, Wet Rubs, Mops, and Salsas, Paul Kirk , 1997, 155832125X, 9781558321250. Its easy for any backyard chef to serve up tantalizing food from the grill! Paul Kirk offers 175 winning recipes that impart bold, zesty flavor to every cut of meat. Kirk covers the classic American sauces with tomatoes, mustard, sugar, or vinegar at their base and offers up a wealth of fresh and creative brews flavored with such things as raspberries, pineapple, ginger, chile peppers, and more. In special Master Classes and elsewhere, Kirk reveals the basic building blocks of spice mixtures, rubs, marinades, bastes, and sauces. He explains how to layer them during the cooking process, so that grilled or barbecued food not only smacks of flavor, but brisket is more tender, steaks form a crispy crust, and ribs melt in the mouth.

The Picture of Dorian Gray (film tie-in), Wilde Oscar, 2009, 0141931140, 9780141931142. Enthralled by his own exquisite portrait, Dorian Gray exchanges his soul for eternal youth and beauty. Influenced by his friend Lord Henry Wotton, he is drawn into a corrupt double life, indulging his desires in secret while remaining a gentleman in the eyes of polite society. Only his portrait bears the traces of his decadence. The Picture of Dorian Gray was a succ de scandal. Early readers were shocked by its hints of unspeakable sins, and the book was later used as evidence against Wilde at his trial at the Old Bailey in 1895.

Heartfelt Poems, Tabetha Martindill, 2012, 1627099093, 9781627099097. The heart can be an impelling factor in the
choices you face in life. It can be an amazing, confusing, or even a horrifying instrument. It can create moments in life that you never want to forget. As well as some that you wish you could. Either way, good or bad, these moments are unforgettable. As these moments passed by me, I wrote them down. My emotions. My feelings. My form of diary to get these moments down on paper and out of head. For I knew these moments would stay with me forever. Now in hopes to relate to others, and even inspire, I share them with you. In my diary of poems, Heartfelt Poems, you will find its not just words. Not only feelings and emotions. It is also a story of my life.

Tremendous Trifles, G. K. Chesterton, 2007, 1602068844, 9781602068841. British writer GILBERT KEITH CHESTERTON (1874-1936) expounded prolifically about his wide-ranging philosophies—he is impossible to categorize as "liberal" or "conservative," for instance—across a wide variety of avenues: he was a literary critic, historian, playwright, novelist, columnist, and poet. His witty, humorous style earned him the title of the "prince of paradox," and his works—80 books and nearly 4,000 essays—remain among the most beloved in the English language. This 1909 collection shows off Chesterton's talent as a master of short-form prose. These "fleeting sketches," which originally appeared the London newspaper Daily News, describe the most ordinary of events and observations, but through Chesterton's eye, they take on profound new meaning. He explores: the secret of a train, an extraordinary cabman, the advantages of having one leg, on lying in bed, what he found in his pocket, an orthodox barber, some policemen and a moral, little birds who won't sing, and much more.

Comic Wars: How Two Tycoons Battled Over the Marvel Comics Empire--And Both Lost, Dan Raviv, 2002, 0767908309, 9780767908306. Embarrassed billionaires tried to keep a lid on this story, but it cried out to be told: how America's greatest comic-book company was driven to the brink of insolvency by warring tycoons and rescued from the abyss by two obscure but wily entrepreneurs. In the late 1980s, financier Ronald Perelman, worth billions and riding high after his hostile takeover of the cosmetics firm Revlon, bought Marvel Entertainment-legendary creator of Captain America, the Incredible Hulk, Spider-Man, the X-Men, and other superheroes-and he had big plans. He not only began churning out more comic books, he also acquired sports cards and other subsidiaries, impressing Wall Street so much that after he took the company public, Marvel's market value ballooned to over $3 billion. Perelman took advantage of the company's inflated valuation by selling junk bonds, and personally pocketing nearly $500 million. Meanwhile, Marvel's bank debt rose to more than $600 million. And then came the collapse of the comic-book and trading-card markets. Enter rival corporate raider, Carl Icahn, who sank a fortune into Marvel's bonds in an effort to wrest away control of Marvel-and to beat Perelman at his own game. As the competing tycoons went head-to-head, Ike Perlmutter and Avi Arad, two entrepreneurs who ran Toy Biz, a company that depended on Marvel superheroes, realized that their fate hung in the
balance. They soon put in motion plans to take control themselves. Bunkered in The Townhouse, his high-security Manhattan corporate headquarters, Perelman had Marvel declare bankruptcy. Icahn, an avid poker player, had to figure out if his foe was bluffing; the Toy Biz entrepreneurs needed to find a way to save the company they loved from ruin; and a team of killer lawyers representing the banks was faced with recouping their colossal debt. Thus, in United States Bankruptcy Court, began the comic war-as ferocious and outlandish as any of Marvel's tales of good vs. evil. Combining meticulous investigative reporting with entertaining storytelling, "Comic Wars exposes the actions and motives of two Goliath-style corporate raiders, two innovative Davids, and some of the world's most prominent banks. It is the rollicking true tale of a unique Wall Street showdown, of Marvel's surprising emergence from the ashes of bankruptcy, and of its triumphant reinvention as the producer of such hit Hollywood movies as "X-Men and "Spider-Man."

War Brothers: The Graphic Novel, Sharon E. McKay, 2013, 1554514894, 9781554514892. Praise for War Brothers, the novel by Sharon E. McKay: War Brothers is a novel that very accurately portrays the criminality of adults who abduct kids to carry out crimes against humanity... This engrossing book is a vivid look at the hideous crimes committed by such groups and should be read by anyone wanting to know about Kony's LRA. -- Lieutenant-General Romeo Dallaire (Retired), international child soldier advocate The life of a child soldier is full of unthinkable violence ... But the human capacity to connect with others and for survival is remarkable. Jacob is a 14-year-old Ugandan who is sent away to a boys' school. Once there, he assures his friend Tony that they need not be afraid -- they will be safe. But not long after, in the shadow of the night, the boys are abducted. Marched into the jungle, they are brought to an encampment of the feared rebel soldiers. They are told they must kill or be killed, and their world turns into a terrifying struggle to endure and survive. In time, the boys escape. Hunted by the rebels, stalked by a lion, and even pursued by river crocs, they miraculously succeed in reaching safety. However, it is no longer enough. Jacob wrestles with the question of whether we are all really beasts inside. He decides the way through the pain is to record his story. Daniel Lafrance's powerful, striking, and poignant artwork and the crisp, evocative text vividly capture the haunting experiences of a young boy caught in a brutal war. This graphic novel is based on an award-winning YA novel by Sharon McKay. Sharon has spent time with child soldiers and based this story on real-life accounts.

Hearing the movies: music and sound in film history, James Buhler, David Neumeyer, Rob Deemer, 2009, 0195327799, 9780195327793. Films achieve their effects with sound as well as images. An ideal text for introductory film music courses, Hearing the Movies: Music and Sound in Film History brings music into the context of sound, and sound into the context of the whole film. The text explores film sound in three parts. Through engaging, accessible sample analyses and exercises, Part I illustrates ways to analyze a soundtrack in relation to the image track. Part II focuses on the
contribute contributions of music to film form and style while offering a number of detailed analyses of different types of scenes; and Part III lays out a concise history of film music and sound, paying particular attention to the role of technological innovations in film production and exhibition. Features: * Detailed sample analyses with timings describe the function of sound and music in individual scenes * Extended exercises suggest tools for basic analysis of the soundtrack * Interludes at the ends of Parts I and II offer guidelines for writing about films in terms of their sound and music * Historical coverage extends from the silent film era to the advent of digital technology and beyond * Provides a broad range of examples from Hollywood, independent, and foreign films, as well as focused analysis * Features sidebar commentary from industry professionals and more than 300 illustrations, including screen stills, photos, tables, diagrams, and musical excerpts * Incorporates the broadest range of scholarship on film music currently available, spanning the disciplines of music and film/media studies * Includes glossary of terms for easy reference * Companion website at http://www.hearingthemovies.net offers additional resources for instructors and students

The Plasma Universe, Curt Suplee , 2009, 0521519276, 9780521519274. Plasma physics is the fascinating science behind lightning bolts, fluorescent lights, solar flares, ultra-bright TV screens, fusion reactors, cosmic jets and black hole radiation, to name but a few examples. Yet plasmas obey their own, often very surprising, rules, and repeatedly defy our best efforts to anticipate and control them. This richly illustrated book reveals for the first time the exciting world of plasma physics to a non-technical audience. It describes the phenomena, and follows the worldwide research effort to comprehend them, taking the reader on a journey from neighborhood neon lights to the remotest galaxies and beyond. The lively text is interspersed with fascinating photographs and explanatory diagrams, giving the readers a deeper understanding of the world around them.

Fundamental Questions in Cross-Cultural Psychology, Fons J. R. van de Vijver, Athanasios Chasiotis, Seger M. Breugelmans , 2011, 1139496417, 9781139496414. Cross-cultural psychology has come of age as a scientific discipline, but how has it developed? The field has moved from exploratory studies, in which researchers were mainly interested in finding differences in psychological functioning without any clear expectation, to detailed hypothesis tests of theories of cross-cultural differences. This book takes stock of the large number of empirical studies conducted over the last decades
to evaluate the current state of the field. Specialists from various domains provide an overview of their area, linking it to the fundamental questions of cross-cultural psychology such as how individuals and their cultures are linked, how the link evolves during development, and what the methodological challenges of the field are. This book will appeal to academic researchers and post-graduates interested in cross-cultural research.

The Horse in Motion: The Anatomy and Physiology of Equine Locomotion, Sarah Pilliner, Samantha Elmhurst, Zoe Davies, 2009, 1405147482, 9781405147484. We all want our horses to be able to perform to the best of their ability and we know that an effective training regime has many facets. The horse must be worked correctly, fed a balanced ration, mentally and physically healthy and well looked after. This book examines a further aspect of the horses performance: it is designed to help all horse owners and riders to understand how a horse moves and how its anatomy helps, or hinders, the horses athletic ability. First, the book uses sequences of photographs and detailed anatomical drawings to show the systems of support and movement at each phase of each of the horses gaits. The walk, trot, canter, gallop and jump are all examined, and the effect of the rider on the horse evaluated so that the rider can take appropriate action to avoid hindering the horse. Tips are provided throughout on ways in which the horses life can be made easier, such as saddle fitting, warming up and cooling down procedures.

Pension Reform: A Short Guide, Nicholas Barr, Peter Diamond, 2009, 0199889066, 9780199889068. This book is an abridgement of Barr and Diamond's Reforming Pensions: Principles and Policy Choices (OUP, 2008). It begins with the introduction to the earlier book, includes the concluding chapters to the sections on principles and on policy choices and the concluding policy chapter to the book. It summarizes the Chile and China chapters into a section of five pages. It presents material from some of the boxes of the longer book. While the longer book remains as a definitive and detailed analysis of pension reform, this new, shorter book conveys the message and conclusions to policy makers, journalists writing for the general public, and students being introduced to social security and other pension policy. The topic being
condensed and summarized here is described at length in the earlier book. It stems from rapidly changing economic conditions and dramatic increases in life expectancy. Newspaper headlines across the globe anticipate again and again a massive rupture of social security and retirement systems. With public fears on the rise, officials in many countries under pressure to solve problems quickly are turning their backs on traditional pay-as-you-go systems in favor of privately financed retirement plans. Barr and Diamond demonstrate that in the age of globalization these problems are no longer simply domestic problems. Because trade borders are becoming increasingly open and digital transactions are hastily erasing national economic boundaries, countries are no longer able to act independently in setting pension policies. These problems are particularly exacerbated in China, a state where massive restructuring of state-owned enterprises and comparatively recent dynamic entry into global markets have already taxed a system whose enormous burden is to support the retirement of the world's largest national population. The authors address these issues comprehensively in a thorough survey of pension economic principles and application to China.

_Camouflage Australia: Art, Nature, Science and War, Ann Elias_ , 2011, 1920899731, 9781920899738. In 1939 a group of artists, designers, architects, scientists and military experts met in Sydney, Australia, to discuss the impending war. Convinced that the need for regional innovations in the military science of concealment and deception was urgent, they nominated a zoologist to lead a campaign to camouflage Australia. Camouflage Australia tells a once secret and little known story of how the Australian government accepted the advice of zoologist William John Dakin and seconded the country's leading artists and designers, including Max Dupain and Frank Hinder, to deploy optical tricks and visual illusions for civilian and military protection. Their work was an array of ingenious constructions for the purpose of disguise and subterfuge. Drawing on previously unpublished photographs and documents, Camouflage Australia exposes the story of fraught collaborations between civilian and military personnel who disagreed over camouflage's value to wartime operations and the usefulness of artists to warfare. In this engrossing book, Ann Elias provides international context for the historical circumstances and events of the organisation of camouflage in World War II in Australia and the Pacific region. She elaborates on the parallel involvement of British and American artists in the field of concealment and deception, and reveals the widespread interest shown by western naturalists and scientists in the application to warfare of the behaviours and aesthetics of animals. Camouflage Australia, by redressing the near invisible contribution of Australian artists and designers to defence in World War II, makes a major contribution to the history of art and to the history of Australia. Importantly, by discussing how citizens dutifully transformed themselves into servants of the war enterprise as camouflage labourers, camouflage designers, and camouflage field officers, the author provides a valuable historical perspective for the 21st century when ethical conflicts and moral struggles dominate debates on war.
participation. And camouflage itself, even in an age of nuclear warfare, retains many of its historical methods and controversies.

Blackstone's Guide to the Coroners and Justice Act 2009, Jonathan Glasson, Julian B. Knowles, 2010, 019957958X, 9780199579587. The Blackstone's Guide Series delivers concise and accessible books covering the latest legislative changes and amendments. Published soon after enactment, they offer expert commentary by leading names on the extent, scope, and effects of the legislation, plus a full copy of the Act itself. They offer a cost-effective solution to key information needs and are the perfect companion for any practitioner needing to get up to speed with the latest changes. The Coroners and Justice Act introduces significant changes to the inquest system, including creating a new national coroner service and establishing a new system of secondary certification of deaths that are not referred to a coroner. It also reforms and clarifies the law on homicide; updates the language of the offence of assisting suicide; and contains amendments to the Data Protection Act 1998 to strengthen the Information Commissioner's powers and improve the sharing of information. It will establish a new Sentencing Council for England and Wales, and introduce changes to sentencing for terrorist offences. It will also introduce changes in the arena of witness anonymity, including: granting Investigative Witness Anonymity Orders in gun and knife crime cases; granting anonymity to vulnerable or intimidated witnesses; and extending the use of live video links and screens around the witness box to enable vulnerable witnesses to give evidence. This new Blackstone's Guide combines the full text of the Act with an expert narrative. It seeks to explain the scope and impact of the Act, including the civil liberties implications, and to bring practitioners up-to-date with this complex piece of drafting. Presented in a straightforward layout, it enables ease of use as a reference source.

Rosie, Anne Lamott, 2011, 1742582516, 9781742582511. If Elizabeth Ferguson had her way, she'd spend her days savoring good books, cooking great meals, and waiting for the love of her life to walk in the door. But it's not a man she's waiting for, it's her daughter, Rosie-her wild-haired, smart-mouthed, and wise-beyond-her-years alter ego. With Rosie around, the days aren't quite so long, but Elizabeth can't keep the realities of the world at bay, and try as she might, she can't shield Rosie from its dangers or mysteries. As Rosie grows older and more curious, Elizabeth must find a way to nurture her extraordinary daughter—even if it means growing up herself.

The Letters of Abelard and Heloise, Peter Abelard, 2010, 1450586805, 9781450586801. Abelard and Heloise are nearly as famous a pair of tragic lovers as the fictional Romeo and Juliet, and their story (as revealed in "The Letters of Abelard and Heloise") remains one of the world's most dramatic and well-known love affairs. Their shared passion for knowledge, religious faith, and one another sealed their destiny. Abelard was a well-respected, 12th-century Parisian philosopher and teacher, and Heloise was his gifted young student. Through their impassioned writings unfolds the story of a romance, from its reckless, ecstatic beginnings to the public scandal, enforced secret marriage, and devastating consequences that followed. These eloquent and intimate "Letters of Abelard and Heloise" express a vast range of emotions from adoration and devotion to reproach, indignation, and grief, and offer a fascinating insight into religious life in the Middle Ages. Their ardor is unmistakable; as Abelard writes to his love, "So intense were the fires of lust which bound me to you that I set those wretched, obscene pleasures, which we blush even to name, above God as above myself..." When their hidden marriage could no longer withstand the challenges in its path, each lover sought refuge in the church--Abelard became a monk and Heloise an abbess. Their correspondence continued as both achieved success in their new careers but continued to struggle with their feelings for one another. "The Letters of Abelard and Heloise" powerfully articulate the wide range of emotions they experienced. So timeless is their love story that--after eight centuries--their passion, their devotion, and their struggle still resonate with readers.

The 6 Husbands Every Wife Should Have: How Couples Who Change Together Stay Together, Steven Craig, 2012, 1439167982, 9781439167984. Clinical psychologist and radio host Dr. Steven Craig offers a revolutionary book that helps couples identify the six different people they need to become over the course of their relationship in order to grow together rather than apart. Throughout his career as a marriage counselor, Dr. Craig has identified a common thread in strained relationships: the belief that change should be avoided at all costs. Determined to destroy this harmful myth, Dr. Craig presents a concept as straightforward as it is original: Marriages dont fail when people change; they fail when people dont change. In 6 Husbands, Dr. Craig divides the typical marriage into six stages, outlining both the common misconceptions and opportunities for growth at each level. From the earliest stage of becoming the right person for your spouse in the new marriage; to thinking and acting like a team; to adjusting to the dynamics of parenthood; to caring for older children and elderly parents; to adapting to the empty nest; and then to growing into the golden years and becoming a dependable companion, Dr. Craig offers new communication tools, rules for intimacy, checklists, and assessments designed to inspire change. The 6 Husbands Every Wife Should Have will revitalize readers notions of marriage and turn it into an ongoing activity that husband and wife can conquer actively together.

The Civil War Day by Day, Philip R. N. Katcher, 2007, 076032865X, 9780760328651. The bloodiest conflict in U.S. history--claiming over 600,000 lives--was also one of the most complex. This handy chronology of the Civil War allows readers to follow the conflict from opening salvo to Appomattox and to grasp at a glance the order and intricacies of all
the key developments, from battles on land and sea to political maneuvers North and South. Principal commanders and political figures, key technology, transportation, and weaponry, all receive due treatment. The Civil War Day by Day goes beyond the major engagements of the war to cover lesser episodes and partisan activities (like Mosbys and Quantrills), providing a reference that is at once fingertip-quick and comprehensive--and an incomparable resource on this critical chapter in American history.

But, for a wealthy middle-aged woman, an international lawyer and a young American, games of bluff and counter-bluff quickly develop into a dangerous and deadly battle. As the action hots up, Chase weaves a fast-moving story of blackmail, intrigue and extortion with a hair-raising climax.

HMS Sweet Tooth, Diane Redmond, 2000, 0192724290, 9780192724298. To coincide with the launch of The Magic Key on BBC Educational television, OUP is publishing a series of picture books based on the Magic Key adventure the characters have in each episode. This section of the television show is also due to be broadcast on Children's BBC television soon. When the Magic Key on Floppy's collar starts to glow, the children are off on a new adventure, whizzed by magic to wonderful lands and faraway worlds. Biff, Wilf and Floppy land aboard HMS Sweet Tooth and are put in charge of the chocolate. But there are pirates nearby with a hunger for sweets - and sharks circling round the ship. The Magic Key is to be a major 26 part BBC television series featuring the characters from Oxford Reading Tree. The Oxford Reading Tree characters are recognized by children in virtually all primary schools, and know and loved by parents and children. This is the first time BBC Education and BBC children's have jointly invested in a children's TV series. It will be shown on both. Transmission dates to be confirmed. The series is produced by HIT Entertainment, makers of Kipper, Percy the Park Keeper and Bob the Builder programmes.

Mauch's Sailboat Guides, Janet L. Mauch, 1994, 0964262193, 9780964262195. A set of two of the most comprehensive sailboat references available including specifications, interiors & illustrations on almost 800 sailboat designs by over 100 manufacturers. An invaluable tool for yacht brokers, surveyors, marine lenders, yards & an especially valuable guide for sailboat buyers. Users may review different designs on today's new or used boat market from the privacy of their own homes or offices. MAUCH'S SAILBOAT GUIDES are published as a set of two volumes (Vol. I & Vol. II) & were written & developed by a yacht broker to help eliminate confusion in the sailboat marketplace. Hundreds of different models are
treated in the two volumes. The volumes are designed to help users save priceless time needed to evaluate sailboats in both the new or used boat markets. They also help users avoid wasted trips. Order this set of two volumes (books may be also ordered separately) from Mauch's Sailboat Guides, P.O. Box 24, Ortega Station, Jacksonville, FL 32210. 800-772-2460.

Heavy Ion Reactions: The Elementary Processes, Parts I&II, Ricardo A. Broglia, Aage Winther, 2004, 0786740280, 9780786740284. Combining elastic and inelastic processes with transfer reactions, this two-part volume explores how these events affect heavy ion collisions. Special attention is given to processes involving the transfer of two nucleons, which are specific for probing pairing correlations in nuclei. This novel treatment provides, together with the description of surface vibration and rotations, a unified picture of heavy ion reactions in terms of the elementary modes of nuclear excitation. Heavy Ion Reactions is essential reading for beginning graduate students as well as experienced researchers.

Programming Amazon EC2, Jurj van Vliet, Flavia Paganelli, 2011, 1449305261, 9781449305260. If you plan to use Amazon Web Services to run applications in the cloud, the end-to-end approach in this book will save you needless trial and error. You'll find practical guidelines for designing and building applications with Amazon Elastic Compute Cloud (EC2) and a host of supporting AWS tools, with a focus on critical issues such as load balancing, monitoring, and automation. How do you move an existing application to AWS, or design your application so that it scales effectively? How much storage will you require? Programming Amazon EC2 not only helps you get started, it will also keep you going once you're successfully positioned in the cloud. This book is a must-read for application architects, developers, and administrators. Determine your application's lifecycle and identify the AWS tools you need. Learn how to build and run your application as part of the development process. Migrate simple web applications to the cloud with EC2, Amazon Simple Storage Service, and CloudFront content delivery. Meet traffic demand with EC2's Auto Scaling and Elastic Load Balancing. Decouple your application using Simple Queue Service, Simple Notification Service, and other tools. Use the right tools to minimize downtime, improve uptime, and manage your decoupled system. "Jurj and Flavia have done a great job in this book building a practical guide on how to build real systems using AWS."

The Love Hexagon, William Sutcliffe, 2000, 0140296093, 9780140296099. Six friends -- three men, three women -- are
all looking for something more from life. But what, or whom, do they want? Meet Lisa, Guy, Keri, Graham, Helen, and Josh. With a tangle of secret lusts hovering among them, it only takes one betrayal to trigger a sudden collapse of social and sexual decorum. As these young Londoners fall in and out of bed with one another in a series of sexual adventures, misadventures, accidents, triumphs, and failures, casual indiscretions begin to have irreversible consequences. By turns funny and sad, embarrassing and moving, The Love Hexagon asks how deep loyalties among friends run when eyes and hearts begin to stray.

**Raising an Earth Friendly Child: The Keys to Your Child’s Happy, Healthy Future ; Level 1, Debbie J. Tilsworth**, 1991, 0962744670, 9780962744679. RAISING AN EARTH FRIENDLY CHILD makes it possible for parents to teach their children environmental skills in an easy, fun manner. In 52 chapters, the book presents activities that parents can use to help their children discover environmentally sound practices. Each chapter includes a brief background & step-by-step instructions. Also included are an Introduction to the Environment, 52 Questions & Answers, & an official "Earth Friendly" certificate for children who complete the activities.

**Aunt Dimity and the Deep Blue Sea, Nancy Atherton**, 2007, 1101101167300, 9781101101167304. The eleventh cozy mystery featuring everyone's favorite phantom-detective Nancy Atherton's Aunt Dimity novels have enchanted thousands of readers, and this new addition to the series is likely to broaden the spell. A series of death threats sends Lori Shepard to a remote island off the Scottish coast and to a fabulous castle restored by an eccentric friend of her husband's. But she finds herself drawn into an elaborate whodunit that may involve smuggling or worse. Why has a human skull washed up on the beach? Is a desolate island really the best place to hide from a murderer? As Lori draws once more on Aunt Dimity's supernatural aid, Atherton whips equal measures of whimsy and suspense into an irresistible confection.

**Street Fighter 1: The Ultimate Edition, Volume 1, Ken Siu-Chong**, 2006, 0978138600, 9780978138608. Due to popular demand, UDON is proud to present Street Fighter: The Ultimate Edition, the most complete and comprehensive collection of the original Street Fighter comic material to date, compiled in an oversized format for distinguishing fans who want to see Street Fighter action like never before! For the first time ever, every single guest backup story, bonus story (from Newtype magazine and the 2004 Capcom Summer Special), guest cover, powerfoil cover and even every side-splitting "Cheap Shots" short from the original series can be found in one convenient collection! The collection will also be presented in an oversized format for fans who don't want to miss even the smallest detail! There never was a better way to join in the martial arts adventures of Ryu, Ken, Chun-Li and the entire cast of World Warriors than the Street Fighter: Ultimate Edition.
Morality Without God?, Walter Sinnott-Armstrong, 2009, 0199910464, 9780199910465. Some argue that atheism must be false, since without God, no values are possible, and thus "everything is permitted." Walter Sinnott-Armstrong argues that God is not only not essential to morality, but that our moral behavior should be utterly independent of religion. He attacks several core ideas: that atheists are inherently immoral people; that any society will sink into chaos if it is becomes too secular; that without religion, we have no reason to be moral; that absolute moral standards require the existence of God; and that without religion, we simply couldn't know what is wrong and what is right. Sinnott-Armstrong brings to bear convincing examples and data, as well as a lucid, elegant, and easy to understand writing style. This book should fit well with the debates raging over issues like evolution and intelligent design, atheism, and religion and public life as an example of a pithy, tightly-constructed argument on an issue of great social importance. "In his call for sincere dialogue with theists, Sinnott-Armstrong provides a welcome relief from the apoplectic excesses of Richard Dawkins and Christopher Hitchens, while also addressing objections to homosexuality and evolution frequently raised by evangelical Christians." --Publishers Weekly "[I]t is accessible and lively, my hope is that it will be widely read, especially by theists."--Peter Lamal, The Humanist "... the clarity of this text successfully defuses many erroneous claims about religion and morality, both popular and academic; this volume certainly deserves a wide audience in this increasingly secular and skeptical world." -Choice "Morality Without God? is an engaging, pithy book arguing against the necessity of God and religion for a robust morality. Walter Sinnott-Armstrong has distinguished himself as a leading philosopher in his work on metaethics and moral psychology, as well as books on moral and epistemological skepticism, and in Morality Without God? he commendably succeeds in writing a philosophically respectable introduction to the problems facing religious morality suitable for virtually any audience." --Philosophia Christi

Oxford Readings in Greek Lyric Poetry, Ian Rutherford, 2012, 0199216207, 9780199216208. Oxford Readings in Greek Lyric Poetry contains 17 studies on Greek Lyric, Elegiac, and Iambic poetry by leading international academics drawn from the last three decades, 3 of which are translated here for the first time. Divided into general studies on themes and case studies on specific poets, they are preceded by a detailed introduction by the editor, Ian Rutherford, which surveys the recent trends in scholarship on Greek Lyric. The volume also contains an up to date bibliography to promote further research into the field. This volume will be a useful resource for students and scholars interested in Greek Lyric and its developments.

Defect and Microstructure Analysis by Diffraction, Robert L. Snyder, 1999, 0198501897, 9780198501893. Defect and Microstructure Analysis by Diffraction is focused on extracting information on the real structure of materials from their diffraction patterns. The primary features of a powder diffraction pattern are determined by the "idealized" periodic nature of the crystal structure. With the advent of computer automation the techniques for carrying out qualitative,
quantitative and structure analysis based on the primary pattern features rapidly matured. In general, the deviations of a particular specimen, from the ideal or perfect crystal structure, cause diffraction peak profiles to broaden and sometimes to become asymmetric. Thus, information on the real structure or microstructure of a specimen can be obtained from a careful study of the diffraction line profiles. The evolving techniques for microstructure analysis from diffraction patterns such as micro-strain, crystallite size, macro-strain and preferred orientation analysis require an ever more detailed understanding of the effects of crystallographic mistakes on peak asymmetry and the effect of the distribution of small crystallites on the tails of diffraction peaks. This book provides a comprehensive analysis of the fundamental theory and techniques for microstructure analysis from diffraction patterns and summarizes the current state of the art. This complete survey lays the foundation for the next and last major development in this field: the extraction of the full information in a powder pattern by the simulation of the full experimental pattern. The goal of this branch of science is to extract all of the information locked in the powder diffraction pattern including: the types and densities of stacking faults, the strain field produced by each, the anisotropic crystallite size and orientation, along with the size and strain distributions of each phase in a specimen. This book provides a complete summary of the developments of the twentieth century and points the way.

Privacy and Print: Reading and Writing in Seventeenth-century England, Cecile M. Jagodzinski, 1999, 0813918391,
AMIDST THE OTHER religious, political, and technological changes in seventeenth-century England, the ready availability of printed books was the most significant sign of the disappearance of old ways of thinking. The ability to read granted new independence as the interactions between reader, text, and author moved from the public forums of church and court to the privacy and solitude of the home. Privacy and Print proposes that the emergence of the concept of privacy as a personal right, as the very core of individuality, is connected in a complex fashion with the history of reading. Cecile M. Jagodzinski attempts to recover the experience of readers past by examining representations of reading and readers (especially women) in five genres of seventeenth-century literature: devotional books, conversion narratives, personal letters, drama, and the novel. The discussion ranges from the published letters of Charles I and John Donne to Aphra Behn's Love-Letters between a Nobleman and His Sister and Margaret Cavendish's literary activities. The author examines how the resulting shifts in religious and literary practices due to the printed book influenced the development of the literary canon. She also addresses women's ambiguous roles in print culture, trying to pinpoint how privacy became gendered in the early modern period. Debates about privacy and individualism still rage in today's computerized society. Jagodzinski's important and well-written book speaks to these present-day concerns and offers a historical example of the effect of new technologies on popular culture.

All The Devils Are Here: Unmasking the Men Who Bankrupted the World, Bethany McLean, Joe Nocera, 2010, 014196989X, 9780141969893. According to Bethany McLean and Joe Nocera, two of America's most acclaimed business journalists, no-one has put all the pieces of the financial crisis together. The finger was pointed at greedy traders, cowardly legislators and clueless home buyers, but many devils helped bring hell to the economy. All The Devils Are Here goes back several decades to explore the motivations of everyone from CEOs and politicians to anonymous lenders, borrowers and Wall Street traders. It exposes the hidden role of companies including AIG and Goldman Sachs. It delves into the powerful mythology of homeownership. And it proves that the crisis ultimately wasn't about finance at all; it was about human nature. Bethany McLean's The Smartest Guys in the Room was the best Enron book on a crowded shelf. All the Devils Are Here will be remembered for finally making sense of the meltdown.

Machine Learning and Knowledge Discovery in Databases: European Conference, ECML PKDD 2010, Barcelona, Spain, September 20-24, 2010. Proceedings, ISSN 0302-9743, ISSN 0302-9743, , Jos L. Balczar, Francesco Bonchi, Aristides Gionis, Michle Sebag, 2010, 3642159389, 9783642159381. The European Conference on Machine Learning and Principles and Practice of Knowledge Discovery in Databases, ECML PKDD 2010, was held in Barcelona, September 2024, 2010, consolidating the long junction between the European Conference on Machine Learning (of which the ?rst instance as European wo- shop dates back to 1986) and Principles and Practice of Knowledge Discovery in Data Bases (of which the ?rst instance dates back to 1997). Since the two conferences were ?rst collocated in 2001, both machine learning and data m- ing communities have realized how each discipline bene?ts from the advances, and participates to de?ning the challenges, of the sister discipline. Accordingly, a single ECML PKDD Steering Committee gathering senior members of both communities was appointed in 2008. In 2010, as in previous years, ECML PKDD lasted from Monday to F- day. It involved six plenary invited talks, by Christos Faloutsos, Jiawei Han, Hod Lipson, Leslie Pack Kaelbling, Tomaso Poggio, and Jur gen Schmidhuber, respectively. Monday and Friday were devoted to workshops and tutorials, or- nized and selected by Colin de la Higuera and Gemma Garriga. Continuing from ECML PKDD 2009, an industrial session managed by Taneli Mielikainen and Hugo Zaragoza welcomed distinguished speakers from the ML and DM ind- try: Rakesh Agrawal, Mayank Bawa, Ignasi Belda, Michael Berthold, Jos eLuis Fl orez, Thore Graepel, and Alejandro Jaimes. Theconference also featured a discovery challenge, organized by Andr as Benczur, Carlos Castillo, Zolt an Gyongyi, and Julien Masan` es.

Cherished, Kim Cash Tate, 2011, 1401686540, 9781401686543. Before healing can begin for Kelli and Heather, they need to believe they are worth cherishing. Kelli London once dreamed of being a songwriter. As crazy as it seemed, she
hoped that God would use the lyrics that came to her even while she slept. She dreamed about Brian too, that the love they shared as high-school students would grow into marriage. But choices that still haunt her destroyed those dreams. Until now when a series of love letters reawakens her hope for the future. Heather Anderson's life has spun out of control, first, an affair with a married man, then a one-night stand with the drummer of a popular Christian band has left her devastated. Broken and alone, she cried out to the only One able to save her. He met her there, but it was just the beginning. Because now she must take a different path. And the one God has planned for her looks nothing like the one she envisioned. As Kelli and Heather awaken to their true worth, they find the freedom to pursue their dreams and relationships based on the security of knowing God's unconditional love.

The Short Story in English, Neil Besner, David Staines, 1991, 0195406834, 9780195406832. This anthology for university courses (general literature and also the short story) presents the short-story form through its classic texts in the English language. An unusual feature of the selection is that almost all of the thirty writers included are represented by two stories, which will permit in-depth comparisons of stories and stylistic analysis. Half the stories are by men, half by women, and one-third of the writers are Canadian.

Among Warriors in Iraq: True Grit, Special Ops, and Raiding in Mosul and Fallujah, Mike Tucker, 2005, 1592287328, 9781592287321. Eight months after George W. Bush proclaimed major combat in Iraq over in 2003, author Mike Tucker found himself right in the thick of it—dirty, profane, violent, lethal, and daily major combat—with some of America's most highly trained and accomplished soldiers. Among Warriors in Iraq is a street-level view of the struggles of maintaining control in the anarchy that pervaded Iraq after Coalition forces declared victory. Tucker journeyed—and fought—with Special Forces groups in both Mosul and Fallujah, cities unconvinced the war was over and willing to do anything to ensure that the struggle would continue. Here is his frank and adrenaline-soaked account, seen through the resilient eyes of the soldiers willing to pay the ultimate price for victory. A street-level view of the hell of combat in Mosul and Fallujah.

The Dictator and the Hammock, Daniel Pennac, 2007, 0099470233, 9780099470236. Manuel Pereira da Ponte Martins, beloved dictator of the state of Teresina in Brazil, develops agoraphobia the day a fortune-teller predicts he will die being torn limb from limb by an angry mob. His life becomes unbearable and he decides to hire a double to stand in while he set off to enjoy himself in the fleshpots of Europe. A few years later, the barber-turned-dictator also grows tired of running the country and employs the same trick as his predecessor to leave for Hollywood. On the boat there, he introduces himself as Charlie Chaplin. But everyone is convinced that he is none other than Rudolph Valentino disguised as Chaplin. When he arrives in New York, both the real actors are waiting for him. Back in Teresina, the doubles follow one another, fooling the people with ease. When Pereira comes back, he is astonished to discover that his stand-in doesn't look anything like him and reacts in a way that can only precipitate his meeting with fate.
